SUMMARY

Full Stack Developer with 1+ year of professional experience and 10+ shipped projects, specializing in the MERN stack and Next.js. Builds enterprise CRMs, EdTech platforms, and internal business tools end to end, from MongoDB schema design and REST APIs to polished, animated React UIs. Strong in AI integration: LLM APIs (OpenAI, Claude, Gemini), RAG pipelines, vector search, and agentic workflows that automate real business processes.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, C, C++

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, GSAP, Framer Motion, Responsive Design

Backend: Node.js, Express.js, REST APIs, Authentication & Role-Based Access Control (RBAC), Third-party API Integration

Databases: MongoDB, MySQL, MongoDB Atlas Vector Search, Vector Databases

AI & GenAI: LLM APIs (OpenAI, Claude, Gemini), RAG Pipelines, Embeddings, Agentic AI Workflows, Prompt Engineering

Version Control & DevOps: Git, GitHub (branching, pull requests, code reviews), Docker, Vercel

Tools: VS Code, Postman, Cursor, Claude Code, Agile

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer | Kanan.co, Vadodara

Aug 2025 – Jul 2026

- Built and maintained MERN-stack web applications for internal teams, owning features end to end from MongoDB schema design and REST APIs to React UI.
- Developed agentic AI automation tools with the Gemini API to handle repetitive HR and operational workflows, reducing manual effort on routine tasks.
- Refactored and optimized existing codebases for performance and responsiveness; triaged and fixed production bugs reported by users.
- Worked with senior engineers and product stakeholders on internal platforms and client-facing tools, following a Git-based workflow of feature branches, pull requests, and code reviews.

Junior Developer Intern | Kanan.co, Vadodara

May 2025 – Aug 2025

- Contributed to full-stack feature development and testing alongside senior engineers, with a focus on code quality and code reviews.
- Built AI-assisted video and audio modules that improved learner engagement on the company's English-learning platform.
- Used AI tooling to generate and curate a 20,000+ question bank of Verbal and Quantitative practice questions used across multiple products.

PROJECTS

Kanan CRM | crm.kanan.co

Team project

- Enterprise, Salesforce-style CRM managing the full lead lifecycle across 32 departments at Kanan.co.
- Built React.js interfaces for cross-department teams, contributed to backend APIs, and led internal QA testing.

Tech: React, Node.js, Express, MongoDB

AgentVisit | kagentvisit.vercel.app

Solo project

- Internal tool digitizing field-agent visits, with a five-tier role hierarchy (Superadmin, Admins, Users, Accounts).
- Integrated Gemini API for automated visit reports, Google Calendar for scheduling, and Google Maps for tracking.

Tech: React, Node.js, Express, MongoDB, Gemini API, Google Calendar & Maps APIs

Anvee Interiors | anveeinterior.com

Client project

- Designed and built a responsive website for a residential and commercial interior design studio with a premium UI.
- Built smooth, interactive animations and page effects with GSAP and Framer Motion, optimized for all screen sizes.

Tech: Next.js, React, GSAP, Framer Motion

Junohub | junohub.co

Lead developer

- Full-stack platform for an organization supporting emerging businesses with workspace, mentorship, and resources.
- Engineered custom UI animations and interactive effects in React and built the complete backend.

Tech: React, Node.js, Express, MongoDB

Edushine | edushinestudyhub.com

Client project

- Client EdTech platform that replaced manual coordination, with four roles: Admin, Teacher, Student, and Parent.
- Covers student enrollment, teacher hiring workflows, assignment management, and parent reporting.

Tech: React, Node.js, Express, MongoDB

Travel CRM

Solo project

- CRM for managing ticketing, travel packages, and lead pipelines, with a Kanban-style opportunities board.
- Integrated the TBO (Travel Boutique Online) API for real-time travel inventory and booking data.

Tech: React, Node.js, Express, MongoDB, TBO API

Other Projects

- **Task Manager + MOM** (task-manager-mom.vercel.app) – Kanban task tracker with meeting scheduling, Minutes-of-Meeting approval workflows, role-based access, and real-time notifications. [MERN]
- **AI Skill Academy** (aiskillacademy.vercel.app) – E-learning app for a design and frontend development course. [MERN]
- **Performance Management System** ([GitHub](https://github.com)) – Team-built PMS with four-role access, goal-setting cycles, performance reviews, and reporting dashboards. [MERN]
- **AI Skill Events** (ai-skill-events.vercel.app) – Registration and information site for an AI hackathon. [React, Tailwind CSS]
- **WealthWise** ([GitHub](https://github.com)) – Personal finance tracker with interactive spending charts. [Python, JavaScript, MongoDB]

EDUCATION

Diploma in Computer Engineering | MSU Polytechnic, Vadodara

Jan 2025

GPA: 7.3 / 10

Secondary Education | MSU Experimental School (English Medium), Vadodara

2022

94th Percentile
