SUMMARY

Full Stack Developer with 1+ year of professional experience building production-ready MERN applications, including enterprise CRM systems, EdTech platforms, and internal business tools. Delivered 10+ projects end to end, from MongoDB schema design and REST APIs to responsive React.js interfaces. Hands-on experience integrating LLM and third-party APIs (Gemini, Google Calendar, Google Maps, TBO) into agentic AI workflows that automate real business processes. Former full-time developer in the IT team at Kanan.co, now seeking a Full Stack or MERN Developer role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, SQL, C, C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design, UI Animations

Backend: Node.js, Express.js, RESTful API Design, Role-Based Access Control (RBAC), Authentication

Databases: MongoDB, MySQL, Database Schema Design, DBMS

AI & Automation: LLM API Integration (Gemini API), Agentic AI Workflows, Prompt Engineering, AI-Assisted Development (Cursor, Claude Code)

APIs & Integrations: Google Calendar API, Google Maps API, TBO API, Third-Party REST APIs

Business Systems: CRM Development, Lead & Pipeline Management, Kanban Workflows, Multi-Tier Role Hierarchies

Tools & Practices: Git, GitHub, Postman, Vercel, VS Code, Agile, Code Reviews, QA Testing, Debugging

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer | Kanan.co, Vadodara, Gujarat

Aug 2025 – Jul 2026

- Contributed to **Kanan CRM** (crm.kanan.co), an enterprise Salesforce-style CRM managing the full lead lifecycle across 32 departments; built React.js interfaces, supported backend development, and led internal QA testing for stability at scale.
- Built and maintained MERN-stack web applications for internal teams, owning features from MongoDB schema design through React.js UI delivery.
- Developed agentic AI automation tools with the Gemini API to handle repetitive HR and operational workflows, reducing manual effort on routine tasks.
- Refactored and optimized existing codebases for performance and responsiveness, and triaged and resolved production bugs reported by end users.
- Collaborated with senior engineers and product stakeholders on internal platforms and client-facing tools as a full-time member of the IT department.

Junior Developer Intern | Kanan.co, Vadodara, Gujarat

May 2025 – Aug 2025

- Contributed to full-stack feature development and testing alongside senior engineers, taking part in code reviews and quality checks.
- Built AI-assisted video and audio learning modules that improved learner engagement on the company's English-learning platform.
- Generated and curated a bank of 20,000+ Verbal and Quantitative practice questions using AI tooling, reused across multiple products.

PROJECTS

AgentVisit (AI-Powered Field Visit Management) | kagentvisit.vercel.app

Sole Developer

Tech Stack: React, Node.js, Express, MongoDB, Gemini API (LLM), Google Calendar API, Google Maps API

- Integrated the Gemini API (LLM) to automatically generate visit reports, replacing manual report writing in the field-agent workflow.
- Digitized the end-to-end visit process with a five-tier role hierarchy (Superadmin, two Admin levels, two User levels, Accounts).
- Automated visit scheduling through Google Calendar API and tracked field visits with Google Maps API.

Travel CRM

Sole Developer

Tech Stack: React, Node.js, Express, MongoDB, TBO API

- Built a full-stack CRM for ticketing, travel packages, and lead pipelines with a Kanban-style opportunities board.
- Integrated the TBO (Travel Boutique Online) API for real-time travel inventory and booking data.

Edushine | edushinestudyhub.com

Sole Developer

Tech Stack: React, Node.js, Express, MongoDB

- Delivered a client EdTech platform that replaced manual coordination, with four user roles (Admin, Teacher, Student, Parent).
- Implemented student enrollment, teacher hiring workflows, assignment management, and parent reporting.

Task Manager + Minutes of Meeting | task-manager-mom.vercel.app

Sole Developer

Tech Stack: React, Node.js, Express, MongoDB

- Built a combined task tracker and MOM tool with a Kanban board, role-based access, and meeting scheduling.
- Implemented MOM drafting and approval workflows with real-time notifications.

Junohub | junohub.co

Lead Developer

Tech Stack: React, Node.js, Express, MongoDB

- Built a full-stack platform for an organization supporting emerging businesses with workspace, mentorship, and resources.
- Engineered custom React.js UI animations and interactive effects to improve visual polish and user engagement.

Performance Management System (PMS) | github.com/Omzala/PMS-Project

Team Project

Tech Stack: React, Node.js, Express, MongoDB

- Built employee performance tracking with four-role access (Super Admin, Admin, HOD, Employee), goal-setting cycles, performance reviews, and reporting dashboards.

AI Skill Academy | aiskillacademy.vercel.app

Sole Developer

Tech Stack: React, Node.js, Express, MongoDB

- Built a full-stack e-learning application for a design and frontend course with a responsive, design-forward UI.

WealthWise | github.com/Omzala/Wealthwise

Primary Developer

Tech Stack: Python, JavaScript, MongoDB

- Built a personal finance tracker that records income and expenses and visualizes spending patterns through interactive charts.

AI Skill Events (Hackathon Site) | ai-skill-events.vercel.app

Sole Developer

Tech Stack: React, Tailwind CSS

- Built a responsive registration and information site for an AI hackathon, optimized for fast page loads.

EDUCATION

Diploma in Computer Engineering | MSU Polytechnic, Vadodara, Gujarat

Jan 2025

CGPA: 7.3 / 10

Secondary Education (SSC) | MSU Experimental School (English Medium), Vadodara

Jan 2022

94th Percentile
